Summary

Full-stack developer building complete products end-to-end – React/Next.js frontends, Python and Node.js backends, and cross-platform desktop apps with Rust/Tauri. Founder-level experience owning products from requirements through deployment.

Featured Full-Stack Projects

Suisik – AI-Powered Learning Platform

Founder / Full-Stack Developer — Next.js, Django, Django Channels, Celery

- Built the full stack for an EdTech platform: Next.js App Router frontend (dashboard, quiz UI, auth flows) and a Django REST + Channels backend
- Implemented async task processing (Celery), rate-limiting middleware, and health-check endpoints for production readiness
- Owned the product end-to-end: requirements, architecture, development, and iteration based on user feedback

Essay Tracker – Desktop Writing App

React, TypeScript, Tauri (Rust), SQLite

- Built a cross-platform desktop writing-practice app with a React/TypeScript frontend and a Rust (Tauri) backend
- Implemented local SQLite persistence and Rust-side modules for grammar analysis and topic tracking

Voice Notes Assistant

Next.js, Django, Django Channels, WebSockets

- Built a full-stack voice-notes app with real-time transcription, AI summarization, calendar integration, and action-item tracking
- Used Django Channels/WebSockets for live updates between backend processing and the Next.js frontend

Notification Server

Node.js, Express.js, Firebase Admin SDK

- Built and deployed a lightweight Express.js microservice delivering Firebase Cloud Messaging push notifications for a production mobile app
- Designed the notification-token lookup flow against Firestore for reliable message delivery

Valentine Gallery

Next.js, TypeScript, Python

- Built and deployed a media gallery web app on Vercel, with a Python script for automated media indexing and cleanup

News Summarizer

Node.js, Puppeteer

- Built a scraping and summarization tool that pulls articles and produces condensed summaries with headless-browser automation
